This is as rough as it gets. Basically have it osrs themes to keep the nostalgia factor in place. 2007rshelp has a blue interface which is kind of bland. Obvi the text wont be all yellow, but needs to be interactive to provide basic info to those who'd need it.

AS far as the skills go, just implement the picture icons to different tables/spreadsheets. Whenever you hover your mouse over a skill it should illuminate from all the rest.

Basic draft of how it would look, Add a home button to have a main directory. Welcome page if you will. Could be creative/funny to make attractive
